About Transgenomic

Transgenomic is a global company that provides versatile and innovative products and services to the medical research and pharmaceutical markets. Transgenomic's WAVE Systems are specifically designed for use in genetic variation detection. They have broad applicability to genetic research and molecular diagnostics. The emerging pursuit of personalized medicine is driving the ongoing need to detect new, uncharacterized mutations and genetic polymorphisms. The high analytical sensitivity of the WAVE System makes it a uniquely enabling technology for the advancement of personalized medicine. To date there have been over one thousand systems installed in over 30 countries around the world. In addition to the sale of systems and consumables Transgenomic provides services to pharmaceutical and biopharmaceutical companies in preclinical and clinical development of targeted therapeutics. For more information about the innovative genomics research tools developed and marketed by Transgenomic, please visit the company's Web site at www.transgenomic.com.
